About

The Group

Single Stop sustainable solutions provider across industries

Among the leading producers of **tailor made** specialty performance chemicals offering **technical services & sustainable solutions**

Single Stop for Oil & Gas textile, FMCG, Cleaning & Hygiene

Designing & Manufacturing of proprietary and ESG oilfield chemical technologies

Sustainable solutions by **substituting** polluting agents while remaining **cost effective**

Attractive industry dynamics with strong **technical barriers to entry** and high levels of development and **product customization**

5 Manufacturing Plants with a total capacity of ~2,68,000 MTPA – **State-of-Art** Facility in USA (1,48,000 MTPA), Ambarnath (76,000 MTPA), Mahape (36,500 MTPA), Malaysia (6,500 MTPA)

Research & Development – Technical Lab in Brookshire JV with Biotex of Malaysia, and **collaboration** with EuroDye of Belgium, Healthguard of Australia, and Sasmira of India

Proven management more than **4.5 decades** of experience

Sector

Focus

Diversified Business Portfolio

An innovative specialty chemicals company delivering technology-driven, solution-based chemistry for its partners.

Oil & Gas

- **Produces** chemicals which play an important role in improving the efficiency, safety, and environmental sustainability of oil and gas production
- Aids in reducing maintenance costs and increasing the lifespan of equipment.

Textile Chemical

- **Specialty chemicals producer** with a focus on textiles chemicals
- **Offering tailor-made solutions** to customers
- Attractive industry dynamics with **technical barriers to entry** and high levels of **development and product customization**
- Biotex Malaysia spearheads the **R&D solutions, application research and product development**

FMCG, Cleaning & Hygiene

- Successfully **diversified** into the **cleaning and hygiene business**
- Leveraged its **existing technical expertise and knowledge** in production and distribution to **gain a competitive advantage**
- Products such as floor cleaners, hand-washes, sanitizers, dishwashers, and toilet bowl cleaners are manufactured

Water treatment

- Manufactures wide range of polymers preventing scale deposits allowing higher flow rates and efficiency for water treatment

Developed technical expertise to enter attractive new markets

Drilling & Oilfield Specialty Chemicals

- Acquired controlling stake in CrudeChem Technologies Group, a well-established U.S. based specialty chemical manufacturer of advanced chemical fluid additives and comprehensive oilfield chemicals solutions for the global oil and gas sector.
- Leader in Designing and Manufacturing Complex and Proprietary Chemical Technologies with ESG Offerings
- Diversified and Growing Customer Base Taking Market Share
- Sizable orders from leading oil and gas company

Water Treatment Specialty Chemicals

- Offers wide range of polymers under Diquest brand, addressing the needs of variety of applications
- Prevents scale deposits in the cooling systems allowing higher flow rates and efficiency

Non-textile areas will contribute to volume and value growth going forward

Single Stop Solution for Textile Manufacturing

Steps	Weaving	Pre-treatment	Dyeing	Printing	Finishing
Process	Sizing	De-sizing, Scouring, Bleach	Dyeing, Washing, Fixing	Rotary Printing, Table Printing	Exhaust Padding
Product Categories	Polymers, Softeners	Enzymes, Wetting & Detergent, Sequestering Additives	Dyes, Acids, Alkali Levelling, Detergent Fixer	Dyes, Binder Thickener, Fixer Detergent, Loop accelerator	Softeners, Silicones, Polymers, Resins

FMCG, Cleaning & Hygiene Portfolio

Manufacturing at Ambernath Plant

Disinfection

House keeping

Kitchen Care

Laundry

Plant approved & certified by Food & Drugs Administration (Maharashtra)
Production of disinfectant/antimicrobial hygiene and cleaning products ensuring safety and effectiveness.

Clientele

Manufacturing Platforms (GMP* Certified)

Location	Operating Facts	Strategic Advantages
 Mahape	Total Production Capacity: 36,500 MTPA	Fungible capacity with capabilities to manufacture products for both textile and cleaning and hygiene.
 Ambernath	Total Production Capacity: 76,000 MTPA Additional factory land premises of 7 acres at Additional Ambernath MIDC	Equipped with modern infrastructure and amenities. Efficient and environmentally friendly
 Selangor, Malaysia	Total Production Capacity: 6,500 MTPA	Provides raw materials to the Indian facilities Cost benefits due to FTAs
  Brookshire Midland CrudeChem Technologies Group	Total Production Capacity: 1,48,000 MTPA	Innovative Product Portfolio of more than 90 chemicals In-house specialties include product design and testing, manufacturing, last-mile delivery and field engineering support.

Collaborations to focus on Innovation & Sustainability

Strategic collaboration with Eurodye-CTC, Belgium, to commercialize specialty chemicals for the Indian market

Facilitates an efficient production system and distribution network across the Indian textile market

Eurodye-CTC has REACH registration, Bluesign certification & GOTS 6 certification for a large selection of its product range

Fineotex is committed to sustainable practices and Eurodye-CTC is also an environmentally conscious company

EURODYE - ctc
TECHNOLOGY AND SERVICE
Since 1856

Strategic collaboration with HealthGuard, Australia to become the exclusive global marketing and sales channel partner with joint operations from Malaysia

HealthGuard® will concentrate on developing cutting-edge solutions, that will be marketed and channelized across the world by Fineotex-Biotex

Synergy will provide durable metal-free sustainable chemistry solutions that are anti-microbial and anti-viral

Range of products over several industries - textile, detergent, leather and allied industries

 **HealthGuard®**

Setting up a state of art Research & Development center in collaboration with Sasmira Institute, one of India's premier textile institutes

Develop a first-of-its-kind Support and Solution Centre for technical service in Sasmira to catalyze innovation and focus on sustainable chemistry

Focus on new sustainable solutions and chemicals to reduce water, time and energy consumption for the textile wet processing industry

Provide the much-needed exposure for students and help provide practical experience, which will benefit the industry in the long term

sasmira
The Synthetic & Art Silk Mills' Research Association

● Facilities at Mahape and Ambarnath, Mumbai, India

● Facility at Bangi, Malaysia
Brookshire, USA and
Midland, Texas

● Sales

- Sales in **~70** countries including Brazil, Bangladesh, Germany, Indonesia, Malaysia, Singapore, Syria, Thailand, USA, Venezuela and Vietnam
- **44+** technical marketing experts
- **115+** dealers in Indian and International markets

Q1 FY27 Revenue Mix

Diversified revenue mix across clients, products and geographies coupled with technical expertise

About

CRUDECHEM
—TECHNOLOGY—

The CrudeChem Technologies Group is a well-established U.S. based specialty chemical manufacturer of advanced chemical fluid additives and comprehensive oilfield chemicals solutions for the global oil and gas sector.

Advantages –

Innovative Product Portfolio: Portfolio of more than 90 chemicals designed to optimize oilfield and water treatment performance.

Product Strategy: leading presence in the friction reducer market, continuously outperforming competitors when tested by third parties.

Comprehensive Service Offerings: In-house specialties include product design and testing, manufacturing, last-mile delivery and field engineering support.

Strong customer Base: Serves customers across the L48 and has a growing international presence

Scalable Platform: High visibility to grow its ESG/proprietary portfolio, expand its distribution, and grow its customer base/wallet shar

CrudeChem Technologies Group – Manufacturing Units

CRUDECHEM – U.S. Operations Overview
Midland & Brookshire Manufacturing Facilities with Advanced R&D Capabilities

Total Manufacturing Capacity –
~1,48,000 MTPA

Cutting edge technical lab and its
primary manufacturing facility.

Scalable Platform: High visibility to
grow its ESG/proprietary
portfolio, expand its distribution,
and grow its customer
base/wallet share

Experienced and Talented Management Team

Management has over 40 years of combined industry experience

Dr. Susanta Mohapatra

Co-Founder, Chief Executive Officer and Chief Technology Officer

Susanta is the CEO and Chief Technology Officer, leading customer service (R&D) and growth initiatives (sales)

- Holds a PhD in chemistry with postdoctoral work in chemical engineering and offers more than 20 years of technical experience through positions in research and as a scientist
- Prior to CrudeChem, Susanta worked at Oil Chem Technology for two years as the QA / QC and HSE manager leading the R&D lab
- Has 4 issued and 7 pending petrochemical related patents

Industry Experience

20 Years

Featured in the Top 100 Innovators & Entrepreneurs Magazine [\(Link to article\)](#)

Prior Experience

Savanna Energy Services Corp.

Jose Ojeda

Co-Founder and President

Jose serves as President and manages inventory, accounting and logistics while supporting sales and marketing growth

- Prior to CrudeChem, Jose worked at an O&G Chemical and Fluid company for three years as a General Manager and at General Electric and Mabe each for over six years in various roles
- Holds an MBA from University of Notre Dame – Mendoza College of Business and a BS in Industrial and Systems Engineering from Tecnológico de Monterrey (ITESM)

16 Years

Miles Grendel

Co-Founder and Chief Operations Officer

- Miles is the Chief Operating Officer responsible for operations across all facilities while supporting sales and marketing growth
- Prior to CrudeChem, Miles worked at an O&G Chemical and Fluid company as a Plant Manager and Field Supervisor and at Savanna Energy Services as an oilfield worker
- Holds a BS in Business Administration from Central Michigan University

11 Years

Kushal Seth

Chief Growth Officer

- Kushal serves as Chief Growth Officer, leading global commercial strategy, market entry, strategic partnerships, and pricing discipline. Drives special projects from concept to operations, building scalable processes and strengthening key customer relationships to support rapid expansion.
- Prior to CrudeChem, Kushal was a core member of multiple high-growth startups, scaling revenues from \$0 to \$500MM+ and supporting capital raises and liquidity events.
- Holds an MS in Chemical Engineering from Texas Tech University with 20+ years of experience across chemicals, oil & gas, lithium, water, and carbon capture; 22+ patents and 40+ technical publications.

20 Years

SCALABLE PLATFORM WITH GROWTH OPPORTUNITIES

EXPAND GREEN CHEMISTRY PORTFOLIO

44%

Revenue from Green Chemistries

- Convert traditional chemistries into eco-friendly, cost-effective alternatives
- Build toward a full green portfolio

GROW WITH NEW & EXISTING CUSTOMERS

Team Focused on Customer Growth

- Leverage industry relationships with operators & OFS providers
- Expand international customer reach

CONTINUOUS INNOVATION

New Tech Offerings Drive Market Share

- Continual innovation leads to proprietary product releases
- Opportunity for further lab investment & new projects

EXPAND SERVICE OFFERING

Field Services Tailored to Customers

- Marketing dry FR & liquid additive pumping services for CrudeChem
- Further investment opportunity in lab & new projects

HALLIBURTON

ExxonMobil

Sustainability

Key Focus

Focus on Sustainability

- **Sustainability** - core of the company's activities, products, partnerships, and markets.
- Among the **first movers** in the journey of sustainability driving positive change within the industry

Customer-Centric Sustainability Benefits

1. Enhanced Resource Efficiency

- Reduced TDS, BOD, and COD in wastewater.
- Lower water consumption and steam usage.
- Energy savings at every stage.

2. Operational Cost Reduction

- Lower utility bills and reduced labor costs.
- Smarter formulations for better efficiency.

3. Cost-Neutral Impact

- Incremental costs of chemicals offset by overall savings.
- Net financial benefits for customers.

4. Among the first in the country

- Use Zero Formaldehyde Resin for Textiles
- Introducing Soda Ash substitute
- Accredited with SA 8000 certification

We place sustainability high on our agenda as it is an integral part of our business strategy

TEXTILE CHEMICALS

- TAM for specialty chemicals used in textile space in India is estimated at **USD 2.4 billion** in 2025.
- Expected to reach **USD 3.7 billion** by 2034 at a CAGR of 4.61% (2026–2034).
- This covers specialty formulations used in textile processing stages like pre-treatment, dyeing/printing, finishing, coating, and auxiliaries.
- Finishing agents and auxiliaries often dominate specialty demand; apparel remains the largest application, followed by home textiles and technical uses.
- Growth is supported by urbanization, real estate (boosting home textiles), sustainability regulations (phasing out harmful substances), and investments in domestic manufacturing.

KEY DRIVERS FOR FINISHING SEGMENT IN INDIA

- Rising demand for technical textiles, apparel with performance features, and home textiles.
- Government schemes (e.g., PLI for textiles/technical textiles) and export growth.
- Shift toward sustainable, low-VOC, and compliant finishes amid stricter regulations.
- Growth in technical applications (protective clothing, automotive, medical textiles).

CLEANING & HYGIENE

The TAM for specialty chemicals in the cleaning and hygiene segment in India, with a focus on B2B/institutional supply is **USD 2.1 billion** in 2024 which is projected to reach

USD 4.5 billion by 2033 at **8.9% CAGR**.

GROWTH DRIVERS

- Rising number of hospitals, hotels, educational institutions, and commercial spaces.
- Stricter regulations and awareness around infection prevention and sanitation.
- Shift toward sustainable, low-VOC, and bio-based specialty chemicals.
- Outsourcing of cleaning services to professional contractors who buy in bulk.

EU, UK & US Trade

Deals Impact

INTERNATIONAL TRADE DEALS

Trade liberalisation across UK, US & EU is driving demand for premium specialty chemicals – a direct growth lever for Fineotex

GB UNITED KINGDOM	US UNITED STATES	EU EUROPEAN UNION
30–45% Projected export growth to UK by 2030	↑ Premium Specialty chemicals over commodity chemicals	0% Duty India-EU FTA on textiles & apparel
Zero-Duty Access ~99% of Indian textile & apparel exports enter the UK duty-free, removing earlier 8–12% tariffs (up to ~16% on some items).	Eco-Friendly Demand US export markets demand eco-friendly, low-emission, high-performance finishing chemicals, pushing processors to upgrade formulations.	Performance Chemicals Higher demand for dyeing, finishing, and performance chemicals as Indian exporters gain significantly improved global competitiveness.
Price Competitiveness Indian goods are now significantly more price-competitive, potentially doubling India's market share and adding ~\$1.1–1.2B annually.	Capacity Expansion Export visibility encourages Indian textile companies to expand spinning, weaving, and finishing capacity — driving specialty chemical consumption.	Commodity → Performance EU export markets push textile processors away from commodity dyes toward premium specialty finishing chemicals.
Export Opportunity (Oil & Gas) Indian refiners and petrochemical producers gain better access for refined petroleum products, specialty chemicals, and downstream petrochemical goods.	Higher Oilfield Activity Higher US energy trade with India and growing oilfield services activity can increase demand for oilfield specialty chemicals.	Energy Infrastructure Enhanced investment provisions encourage partnerships in energy infrastructure, refining technology, clean fuels, and transition-energy initiatives.
Technology & Financing Technology transfer and financing support to modernize legacy oil & gas assets for lower emissions.	Energy Cooperation India's expanding imports of US energy and energy-sector cooperation will drive activity in drilling, refining, and midstream services.	Stable Long-Term Growth Rules of origin and bilateral trade facilitation provisions ensure smoother cross-border trade of components and specialty chemicals.

Financial

Performance

Mr. Sanjay Tibrewala
Executive Director

During the quarter, the Company delivered strong operational and financial performance, supported by the successful integration of the acquired oilfield specialty chemicals business. The acquisition has strengthened our presence in the oil and gas segment and contributed significantly to revenue growth. Under Fineotex's management, our U.S. operations have witnessed significant improvements in operational efficiency, capacity utilization, and execution capabilities, resulting in improved EBITDA margins.

Our domestic business also recorded healthy growth despite volatility in global raw material prices arising from geopolitical tensions. We successfully passed on the increase in input costs to our customers, enabling us to maintain healthy margins while continuing to strengthen customer relationships.

To meet the growing demand for oilfield specialty chemicals in the U.S. market, we doubled the manufacturing capacity at our new facility, positioning the business to cater to larger customer requirements and support future growth.

The improvements in our oil and gas business have established a strong foundation for sustainable growth. With enhanced operational efficiencies, expanded capacity, and increasing customer demand, we believe the business has significant potential for further growth in both revenue and profitability.

Certificate	Value Proposition
   	- ISO 14001: 2015 has standardized and proven framework that help organizations to develop an effective environmental management strategy; - Global recognition for organizations' efforts to improve their environmental strategies - OHSAS 1800:2007 is an international standard which provides a framework to identify, control and decrease the risks associated with health and safety within the workplace. Implementing the standard signals stakeholders that employee's health and safety as a priority within the organisation - The SA 8000 Standard is the world's leading social certification program. It provides a holistic framework allowing organizations of all types, in any industry, and in any country to demonstrate their dedication to the fair treatment of workers - Star export house is an Indian exporter who has excelled in international trade and successfully achieved certain minimum amount of export performance in two out of three financial years - This certification provides significant competitive advantages in international trade
        	- Fineotex Chemical Limited has earned the prestigious ECO PASSPORT by OEKO-TEX® certification, the highest rating in the globally renowned audit that measures standards of sustainability - Received certification from the US EPA for HeathGuard's market leading anti-microbial treatment - Received Dun and Bradstreet ESG Badge, it showcases the impact of ESG listing and ranking on organizations, and recognize their contribution towards sustainability - Accredited by NABL, India's leading accreditation body that assesses and accredits laboratories - IGBC (Indian Green Building Council) certification is a rating system developed by the Indian Green Building Council to promote sustainable building practices in India. - Scivera Certificate of Assessment - The Great Place to Work certified - WHO Good Manufacturing Practice certified - FDA which is Food and Drug Administration is a government agency that regulates certain food, drugs, cosmetics, and medical products

Fineotex and Biotex play a critical role in sustainable chemistry and drive efforts towards social responsibility

Certificate	Value Proposition
	Bluesign is recognized as a leading certification for sustainability in the global textile industry. As a partner, Biotex is committed to applying the bluesign system to meet the highest level of safety for both people and environment, to use resources responsibly, and to continuously improve environmental performance
	The Global Organic Textile Standard (GOTS) is recognised as the world's leading processing standard for textiles made from organic fibres. It defines high-level environmental criteria along the entire organic textiles supply chain and requires compliance with social criteria as well
	European certification which validates raw materials used for Bioguard C6 repellent (manufactured by Biotex) from a sustainability stand point
	- BHive is a platform that promotes transparency and the use of more sustainable chemistry for textile and apparel manufacturers, brands, and retail organizations - BHive membership demonstrates commitment to chemical sustainability and transparency
	ISO 9001:2015 defines the guiding principles to create efficiencies by aligning and streamlining processes throughout the organization, create new opportunities, meet regulatory requirements, and help organizations expand into new markets in which clients demand ISO 9001 certification
	- Part of a global multi stakeholder initiative within the fashion and footwear industry working towards reducing chemical footprint - Aim is to accelerate progress towards ultimate goals of cleaner water, cleaner air, and safer production
	HACCP is a management system in which food safety is addressed through the analysis and control of biological, chemical, and physical hazards from raw material production, procurement and handling, to manufacturing, distribution and consumption of the finished product. HACCP Principles & Application Guidelines

Leading the transition from synthetic to lower carbon footprint products

Disclaimer

This presentation contains statements that contain “forward looking statements” including, but without limitation, statements relating to the implementation of strategic initiatives, and other statements relating to Fineotex Chemical Limited (“Fineotex” or “Company”) future business developments and economic performance.

While these forward looking statements indicate our assessment and future expectations concerning the development of our business, a number of risks, uncertainties and other unknown factors could cause actual developments and results to differ materially from our expectations.

These factors include, but are not limited to, general market, macro-economic, governmental and regulatory trends, movements in currency exchange and interest rates, competitive pressures, technological developments, changes in the financial conditions of third parties dealing with us, legislative developments, and other key factors that could affect our business and financial performance.

Fineotex Chemical undertakes no obligation to publicly revise any forward looking statements to reflect future / likely events or circumstances.
