Diquest™ Scale Inhibitors
For Industrial Water Treatment

About Us

- Fineotex is Public listed company in India with Market cap of 4000 Crores
- Heritage of 40 years in manufacturing of various chemistries and technologies for end markets textiles, detergents, Oil & Gas, Paints, Water treatment
- JV with Biotex Malaysia with 72% holdings
- Manufacturing asset in India (Close to Port) and Malaysia
- Export footprint in 69 countries around the globe, recognized as Star Export House
- Recognised as 25 Fastest growing Chemical Companies of India by The CEO Magazine June 2018
- Accreditations – ISO 9001:2015, ISO 14001:2015 and OHSAS 18001:2007

Diquest™ Scale Inhibitors

FINEOTEX offers a wide range of polymers under the Diquest™ brand name to address the needs of a variety of applications.

Various industries use cooling system to remove heat by absorbing it with circulating water systems. Recirculating water can filter impurities that could lead to the precipitation of salts. The precipitation of salts and other particles can deposit on equipment surfaces, resulting in lower heat transfer efficiency with increased maintenance cost and unscheduled downtime.

Diquest™ range of scale inhibitors demonstrate reliable performance in preventing scale deposits allowing higher flow rates and efficiency.

Product Name

Chemistry

Diquest™ 1400

Acrylic Homopolymer

Diquest™ 1500

Acrylic Homopolymer

Diquest™ 2400

Acrylic Sulphonic Copolymer

Diquest™ 3600

Ter Polymer

Diquest™ MP 220

Polymaleic Acid Polymer

FCL FINEOTEX CHEMICAL LIMITED

Manorama Chambers, S.V. Road, Bandra (W), Mumbai – 400050.
